EDUCATION

Georgia Institute of Technology

Atlanta, GA

M.S. in Computer Science — Specialization: Artificial Intelligence and Machine Learning

Aug. 2026 – May 2028

Stony Brook University

Stony Brook, NY

B.S. in Computer Science and Applied Mathematics & Statistics

Aug. 2022 – May 2026

- GPA: 3.65/4.00 | Dean's List (All Semesters)
- Teaching Assistantships: Data Structures and Algorithms, Object Oriented Programming, Calculus IV
- Achievements: Rank 1 out of 20 in Computational Geometry
- Relevant Coursework: Machine Learning, Software Engineering, Data Science, DSA, Computer Networks, OOP

EXPERIENCE

Backend Software Engineer Intern

Remote

Springer Capital

Dec. 2025 – Feb. 2026

- Engineered an ETL service to extract HubSpot and Redtail CRM deals using Python, Flask, and DLT.
- Designed a serverless data pipeline with automated failure recovery, ensuring 100+ continuous CRM deal workflows.
- Integrated automated ETL tests using Docker mock servers to simulate 100+ JSON deals.
- Optimized data extraction for large datasets by building Python generators to batch-process 50,000+ records without buffering into memory.

AI Validation Expert

Remote

Snorkel AI, Inc.

Sep. 2025 – Dec. 2025

- Evaluated AI-generated code across Python, JS, and TS for logic and style, improving prompt performance by ~80%.
- Enhanced training repositories via iterative prompt engineering, delivering code submissions for major LLM providers.
- Analyzed failure patterns across 10+ models, identifying logic hallucinations and documenting where the AI took implementation shortcuts.

Software Engineer Intern (REU)

Orlando, FL

Limbless Solutions @ University of Central Florida

May 2025 – Jul. 2025

- Developed a prosthetic training game using Unreal Engine, C++, and EMG controllers, aiding 20+ patients with limb differences during rehabilitation.
- Constructed a responsive in-game system to interpret muscle flexes and prosthetic movements in less than 200ms.
- Built a multiplayer in-game UI, providing feedback for up to 4 simultaneous users during practice sessions.
- Researched EMG signal mapping, latency reduction, and AI game testing, documenting best practices for designing effective rehabilitation tools.

PROJECTS

Phreddit | *Node.js, React.js, MongoDB*

[LINK](#)

- Built a full-stack Reddit-like platform, supporting JWT authentication and creation of 5,000+ pieces of content.

Strata Chess | *Next.js, React.js, MySQL, Tailwind CSS*

[LINK](#)

- Launched a full-stack web application delivering chess gameplay against Stockfish, the world's #1 chess engine.

SKILLS

Programming & Markup Languages: Python | JavaScript | TypeScript | Java | C | C++ | SQL | Ruby | Rust | HTML | CSS

Frameworks & Libraries: React.js | Next.js | Node.js | Spring Boot | Django | Flask | Prisma | Express.js | Angular | Tailwind CSS | FastAPI | Pandas | NumPy | PyTorch | TensorFlow | scikit-learn | SciPy | Matplotlib | XGBoost

Tools & Platforms: MongoDB | PostgreSQL | AWS (S3, Lambda, RDS) | Docker (Kubernetes, Swarm) | Postman | Jest | JUnit | Claude Code | Codex | Cursor | Git/GitHub | DLT | Unreal Engine | Wireshark
